

Answer Key — Full Paper

Final answers with a one-line reason.

Objective

- Q1 (b) 1526 — First Battle of Panipat, Mughal Empire founded.
-
- Q2 (a) 1-B, 2-A — land → rent; entrepreneurship → profit.
-
- Q3 (b) Non-renewable resource — iron ore is a metal ore.
-
- Q4 Utility.
-
- Q5 Todar Mal — surveyed land & fixed crop prices.
-
- Q6 Human capital.
-
- Q7 (b) The Ahoms — led by Lachit Borphukan.
-
- Q8 (a) Both correct and R explains A — the "resource curse".
-
- Q9 (c) is incorrect — labour is effort, human capital is the skill behind it.
-
- Q10 (b) Five Turkic-Afghan dynasties (Mamluk → Khilji → Tughlaq → Sayyid → Lodi).
-

Short Answer

- Q11 Technologically accessible, economically feasible, culturally acceptable.
-
- Q12 Human resource = people who apply knowledge, skills & decision-making to create goods/services. Example: a doctor, chef, scientist or teacher.
-
- Q13 Paik system: every able-bodied man gave labour/military service in exchange for land — a large force without a permanent standing army.
-

Long Answer

- Q14 Meet present needs without harming future generations. (1) Restore & regenerate renewables within recovery limits; (2) use non-renewables judiciously till greener options come; (3) ensure fair access to basic resources for all.
-
- Q15 Human capital = people's knowledge/skills/experience (built by education, training, health), embodied in people. Physical capital = human-made assets (machinery, tools, buildings) & money that can be bought/sold.
-

- Q16** (1) Shifting the capital to Daulatabad — people forced to travel 1,000+ km, then moved back → loss of life. (2) Token currency — copper coins declared equal to silver/gold → counterfeiting → economic decline.
-

Very Long Answer

- Q17 Akbar:** early brutality (Chittor) → grew tolerant; abolished jizya, promoted **sulh-i-kul**, Rajput marriage alliances, Hindu officials, interfaith dialogues, house of translation → stable, expanded empire.

OR — Punjab: HYV wheat/paddy needed more water; free power → over-pumping; chemicals polluted groundwater → ~80% "over-exploited", water below ~30 m. Lesson: short-term food security caused long-term unsustainability; use within recovery limits.

- Q18 Entrepreneur:** has an idea, takes risks, gathers factors, makes a startup succeed. Five tasks: identify a problem & resolve to solve it; take risks (money/time); combine factors of production; make key decisions; contribute to society's welfare.

OR — Four factors: Land (natural resources, e.g. soil/water); Labour (physical & mental effort, e.g. a carpenter); Capital (money + machinery/tools); Entrepreneurship (risk-taking organiser who starts the business).

Passage & Map

- Q19** (i) Nature ignores political boundaries, so states compete for the same water. (ii) Any two of: Karnataka, Tamil Nadu, Kerala, Puducherry. (iii) Negotiations and careful (deft) management for fair sharing.
-

- Q20** Hampi/Vijayanagara = Karnataka (south); Delhi = north India on the Yamuna. 1 mark each for correct location + label.
-
